

Do you need help to make your garden work?

I'll visit your garden and provide you with advice that's just perfect for your garden and your needs. I've been providing gardeners just like you with expert advice on how to create gorgeous gardens for nearly 2 decades.

Your own garden visit will help to solve some of your trickier questions that you just can't work out the answers to.

A visit to your existing or proposed productive garden may cover a wide range of topics.

Things like:

- How do I improve my soil?
- How can I start my own productive garden and become more environmentally friendly?
- What are the best fruit trees for my garden?
- How can I integrate food into my established garden?
- How do I prune these trees for best harvest results?
- Can you plan my garden for me? ...and lots more

As a guide, I generally spend one to two hours in a garden, planning, instructing you and discussing issues and the best options for sustainable, eco-friendly solutions.

What will you get?

Your own personalized garden handbook detailing my visit and solutions to your garden issues. Satisfaction of knowing what to do and having the direction for further garden planting, development and maintenance.

Testimonials

Hello Linda,

Gabe and I were very grateful for, and inspired by your visit yesterday. Lots to think about and to do in bite-size chunks. We look forward to seeing you again next week. Roberta

Hello Linda

Thank you for this morning; we found it both informative and inspirational beyond expectation.

We look forward to sharing pictures of the many stages our garden will go through; it is going to be a joy - both the process and the outcome.

Cheers Graham & Kathy
